A man on vacation from his job as a sex god?Von GreystarTrue enough, Brian is a hero of his time (2502), where it is a sport to give women an orgasm as fast as possible - in a stadium. He needs a vacation: No sex, no women! So he chooses his ancestral castle in Irland to get away from it all. A time travel to 2002 to a deserted place should do the job of relaxing

him for the next season's championship. Ally was dumped by her husband. She was the best wife there could be and that was the problem. Her ex wanted fire - while Ally wrote books on how to be perfect - as wife, in marriage, as lover etc. She is on vacation with her aunt, a lady with a crush for men and spirits - even though she feels both are eluding her. Ally and Brian run into each other at the ruined castle of his ancestors where Ally's aunt hopes to at least find a vampire. Ally just wants to get over and done with it, struggling to write a new book with 'hot sex' in it. As she obviously lacks the knowledge she turns to Bryan who seems to be the expert. But he has a contract, forbidding any sexual activity. Moreover, instead of relaxing, soon his trainer, his opponent, his manager and finally his boss appear at the camping site. To make things worse, the old castle seems really to be haunted, the desire between Brian and Ally grows, and suddenly a deathly thread hangs over them. I only give this book four stars as at some place it lacks the typical fun and intensity of some of the other of Bangs books. Still it is absolutely worth reading, a must for all Bangs' fans and it stands alone, you need not to have read anything from the author. The characters are well drawn, the side characters have a life of their own and sometimes the clash of time and culture is great. 1 von 10 Kunden fanden die folgende Rezension hilfreich. futuristisches fantastisches Märchen für große Mädchen Von P.I.A. unser Held kommt aus der Zukunft... er will Urlaub machen... spter stellt er dann witzigerweise fest, da er sein eigener Ururur... -enkel oder -grovater ist... kommt drauf an, aus welcher Perspektive man das ganze betrachtet. mysteris geht es um ihn her. ein Geist, der keine Ruhe findet und seine Chefs... die um ihn bangen... ein besinnlich ruhiger Urlaub - wie er ihn eigentlich erleben wollte - wird es nicht. dafür trifft er die Frau fürs Leben.

**Kurzbeschreibung** He is the MVP of the future's hottest sport. In the year 2502, sex is a spectator sport, and Brian Byrne is its undisputed champion. He plays with a passion for the game, never for the woman. So why does he feel burned out, used up, and in need of a vacation? A few weeks in a simpler time where he doesn't have to think about sex sounds great. She wants a perfect night of pleasure. Ally O'Neill is having a career crisis. She is the best-selling author of a series on how to be the perfect wife. She is also recently divorced, so her perfect-wife theory obviously needs fine-tuning. Her publisher now wants Ally to write about a night of sexual pleasure from a single woman's perspective. What does she know about sex and today's single woman? Nothing. Ally requires a consultant with sex-god credentials. Ally and Brian meet in the present beside the ruins of an Irish castle. And in a world where no one has ever heard of the Testosterone Titans, Brian is about to discover that scoring is a lot less fun than falling in love.
