Imaginative and unique take on an old mythVon mountainmamaWhen Melody's mother dies, she is alone in the

world - more so than others because she is also deaf. While driving home in a blinding snowstorm, she encounters a Sasquatch, and wrecks her car trying to avoid hitting him. He rescues her and shelters her among his people. Basically a love story, I was fascinated with the culture created by Ms. Jeppsen for the mythological creatures. Her world-building skills are amazing and characters are well-defined and believable. You come to love these gentle giants and fear for their continued existence as the outside world tries to exterminate them. Beautiful prose along with a fast-paced story make it one of my favorites of the year. I highly recommend this book to fantasy/sci-fi lovers. Well done, Ms. Jeppsen!

Kurzbeschreibung In this modern world of science and high technology, in secret places deep under the ground and in the forest primeval, legends still walk the earth and what we think of as myth and fairy tale are all too real. Driving home late one night, Melody Carver, bereft and grieving after the death of her mother, sees a strange creature standing on the lonely road. This being will change her world-view forever, and open her eyes to a reality beyond her imagination. Melody's chance encounter on that dark and snowy road will mark the beginning of a journey of discovery and wonder that will bring two worlds together in hope and despair. Can one person bridge the gap between the ancient and the modern, the mundane and the magical? An urban fantasy filled with adventure, romance, war, heartbreak and triumph!
