In this one its in such a fresh tale. Konstanse Bugg inherited her singing voice from her Opera singer mother. In a period when stage singers and actresses were tainted with the disrepute of being easy women, Konstanse find a new way of playing the seductress!She had come to Penperro to escape her vile husband, hoping to blend into the small village of Cornwall. Only the Cornish Villages are not the placid country folk she envisioned. The village are in 'trade' one might say, smugglers and hot on their trail is Foweather, the King's man determined to put an end to the smuggling.

However, Foweather stumbles upon her singing, thinks her a mermaid. She hides in a cave to escape being detected and stumbles onto the smugglers cache and Tom Trewella. Tom convinces her smuggling is needed for the people to survive, so hires her to play mermaid to distract Foweather. Hot on her trail is the odious hubby's equally odious son, furious his step-mum inherited the family fortune. This is great fun from start to finish, making Cach as a refreshing writer with a deft style. 0 von 0 Kunden fanden die folgende Rezension hilfreich. A "Keeper"! Von Detra Fitch Konstanze had been gifted with her mother's talent of singing opera. When her mother was on her deathbed, Konstanze vowed to marry John Bugg for security despite him being decades older than her. After two years of abuse, she fled to a cottage in Penperro (Cornwall) that her husband did not know she had inherited. The husband sent his son, Bugg II, to locate her. Mr. Foweather was with the Preventive Water Guard Service. He was in Penperro to catch smugglers. However, the people of Penperro could not afford the high taxes of the Crown. Smuggling was the only way they could survive. When Foweather heard Konstanze singing, he followed her voice and thought he saw a mermaid. Upon seeing him, Konstanze dove into the sea to hide because she had been swimming nude (in her private cove). This gave Tom an idea. Tom Trewella was not a smuggler himself, but he did do the paperwork, scheduling, selling, and such of the smuggled goods. He hired Konstanze to play the part of a mermaid to lure Foweather and his crew away whenever they got too close to the ships or goods. The entire village got into the act. Soon, the Mermaid of Penperro became a legend! \*\*\*\*\* This one is a keeper! I loved it so much that I refuse to even loan it out, for fear of losing it! The mermaid costume was designed artistically for easy and fast maneuvering! Awesome story that I highly recommend! \*\*\*\*\*

**Kurzbeschreibung** In 1804, in the village of Penperro, Cornwall, life is looking dim for the villagers who rely on smuggling more than fishing for their daily bread. The Preventive Water Guard has come to town, and stationed a boat in their very own harbor. Tom Trewella is not one to be defeated by a little thing like a boatload of the king's men. When a singer on the run takes refuge in a cottage nearby, he devises a plan to distract the tax men from their duties: Penperro will have a mermaid. Konstanze will do anything to stay hidden in the wilds of Cornwall. If that means donning a fish tale and splashing about while singing operatic arias, she'll do it. For the proper fee, of course. What neither of them expect, though, is the danger that can come when a man outside the law lands a mermaid who is anything but a cold fish.
